Solution Details

Solution description

Using this program will be beneficial for students, because they will be motivated and will want to study. Our program teaches them to never give up. Our program is also based on psychology. It gives reason to every action. Program is also fun, it provides educational movies, videos and games.

Solution context

Main problem students are facing today is stress. Program that we created will help to solve this problem. We are helping students to understand that learning can be fun. We help them to realise that all the subjects are useful and we are also giving reasons and showing cases where the subject can be used and how it can be used. We are tryin to avoid hate towards the subject.

Solution target group

The target group of the program will mainly be teenagers, middle schoolers and high schoolers, because mostly this group of people suffer from stress and anxiety due to studies. But everyone who needs help is free to join!

Solution impact

By motivating students and making learning fun, student's academic performance will improve. If students study better then we will have more professionals in the future

Solution tweet text

required to leave empty

Solution innovativeness

The difference of our program is that it gives a reason for every action, there is always an explanation. We can explain what is needed and why.

Solution transferability

The main point is to reduse stress, so the solution can be used in other spheres too. It can be used to motivate different people towards different actions.

Solution sustainability

Our plan for now is to present our idea to different people and get their opinions on that. We already started some parts and if our idea becomes successful we will try our best to code the best quality and make it go viral.

Solution team work

We were good listeners, we respected each othe and we tried to avoid any kind of conflict or

argument, by doing that we are already on the halfway to our goal and now we are already submitting it. We learned plenty of new stuff from each other and we believe that we will be able to work together in the future.
