### Solution Details

#### Solution description

Me'Do is website where is intergrated verified, valid online lerning materials for every subject, both theoretical and practical. For example, the writers' biography, poetry, articals, different exercises, quizzes, etc. Also animations, 3D images, educational game and other audio and video sources. to cut short, this onlain platform combinate as many digital material as it is possible. Moreover, MeDo gives you opportunity to create your personal online diary, where you can write your daily stories or write a letter for future "me". As well, if necessary you can ask questions to psychologists. This will be anonymous. To be more clear, except web developers, graphic and narrative designers, the

website units different specialists who can be helpful for school children. therefore, in one hand, such digital space get searching process easier and effective, online learning will be much more interesting with Me'Do. On the other hand, students will have opportunity to have fun. They study how to use internet correctly. This issue is really important, because, most of pupils do not know how many interesting opportunities are on the internet.

To measure the success of this platform, at the beginning there will be only one subject's materials. For instance literature. And if it works, if schoolchildren and teachers take advantage of this opportunity, the amount of information will get more and more. There will add other subjects step by step.

When the website gets more or less perfect form, the commercial goals of this project will also increase. So in addition to noble goals, the project team will be able to make money.

## **Solution context**

to create such diverse website, which conclude huge information about different subjects and also it is good way for fun, is not easy. It needs great financial and human resources. Also it may be protracted in time.

## **Solution target group**

the target group of the website is school children and teachers.

## **Solution impact**

MeDo should help schools to get closer with digital space. Online learning should be more pleasant for pupils and teachers. to measure the positive impact, there will be periodical interviews with target schools.

## **Solution tweet text**

Let's get online learning easier and pleasant with Me'Do!

## **Solution innovativeness**

the main characteristic of Me'Do is that it helps digital creators' work to be widespread.

## **Solution transferability**

the sources from Me'Do can be used by universities to. Also every single person who is interested in learning materials will be able to use this platform.

## **Solution sustainability**

Main necessity for implementing the project is team which should be completed by specialists. in the mid term there will be only several subjects and in the long term the amount of resources will get greater.

## **Solution team work**

team work is crucial for this project, so I will work with my team in the future too.
