# Solution Details

## Solution description

To solve this problem we made Masters. Website where every type of information can be gathered-like university catalogues, registration to exam, courses, funding...

## Solution context

Problem can be get belief of big universities.

## Solution target group

Firstly it can be our country students. After more extend for more countries.

## Solution impact

Our solution make things easier and will be comfortable for learners to get information in the area.

## Solution tweet text

We made site for every students who need guide into education.

## Solution innovativeness

Its easy for navigate, and enough for everyone. Also it can be used by any types of customers, even for persons with special needs. In this situation Bot will help them, who has physical, psychical or sensorial disorders. Bot itself going to gather information and improve services.

## Solution transferability

It has growth potential, for attract more people in our area.

## Solution sustainability

For future: Masters is going to extend and help people to find more programs and courses about School's, Bachelor's and doctorate degrees.

## Solution team work

Worked on idea: Mariam Papukashvili, Revaz Migineishvili, Zaal Siordia, Nika Jologua.
